Introduction

Detect your look from natural waves to defined curls. The adjustable heated barrel can change gradually from small to big for achieving your desired style.

- There are 4 settings (SenseIQ), 210, 190, 170 for you to choose for different hair types.

- SenseIQ is a coding mode with precise time and temperature paired with the barrel size for optimal results.

- The 3 curling directions (left, right and alternate) add more variety to your styling options. You can now curl both sides to perfect symmetry - or alternately, curl to have a mix of right and left-sided curls for a completely natural look.

Overview

1 Temperature mode display

2 Curling direction switch

3 On/off button & Temperature button

4 Heat protection cap

5 Curling barrel

6 Base unit

7 Base side slider

8 Hair sectioning accessory

9 Hair straightening accessory

10 Barrel cleaning accesso

How to curl your hair:

1 Connect the plug to the power supply socket.

2 Turn on the power button on top/bottom until the display shows lights up.

3 Press SenseIQ mode setting will be displayed.

4 Then turn on the temperature button on the appliance is switched on, providing additional shade and reduces frizz.

5 Turn through the power on/off button to select the desired setting 170, 210, 190, 170.

The indicator will stop blinking when the heated tone is ready for use.

6 Turn on the heat protection cap on the barrel side of the slider (left/right).

7 Push the barrel side to the desired tone.

8 Determine the amount of hair by using the sectioning accessory. Start styling.

9 Hold the appliance vertically with the open end of the curling chamber towards the head. The display panel side should be faced towards your hair.

10 Keep hand one side of the tool.

11 Place the barrel side of the tool. Allow the hair to pass through the curling chamber, while holding the hand strands.

12 Turn the heat protection cap. Allow the hair to pass through the curling chamber, while holding the hand strands.

13 Hold the barrel side of the tool. Turn the heat protection cap back to the first when you are done with the tool. The heat strand will be automatically curled into the shape you want.

14 Repeat the same steps for the rest of the strands.

15 Once all the strands are curled, turn the heat protection cap back to the first.

16 Turn the heat protection cap. Allow the hair to pass through the curling chamber, while holding the hand strands.

17 Hold the barrel side of the tool. Turn the heat protection cap back to the first.

18 Once all the strands are curled, turn the heat protection cap back to the first.

19 Turn the heat protection cap. Allow the hair to pass through the curling chamber, while holding the hand strands.

20 Hold the barrel side of the tool. Turn the heat protection cap back to the first.

21 Turn the heat protection cap. Allow the hair to pass through the curling chamber, while holding the hand strands.

22 Turn the heat protection cap. Allow the hair to pass through the curling chamber, while holding the hand strands.
